

# igneous

by smartfire

where style meets performance

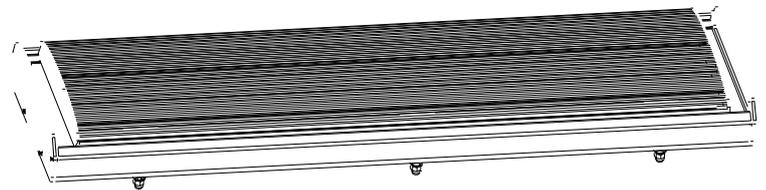

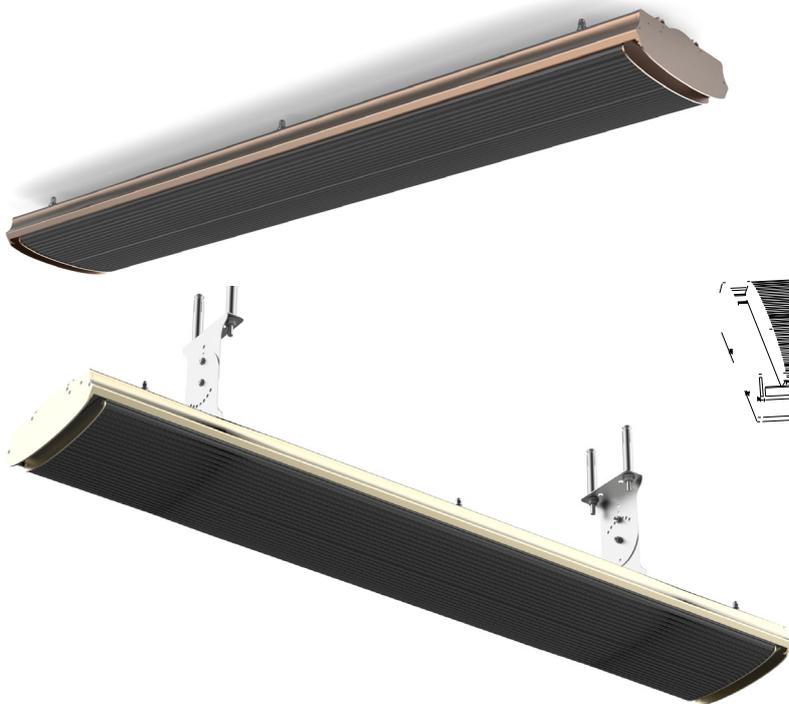

The Igneous Infrared heater's elegant design not only mixes aesthetics and practicality, but will effectively and economically heat any environment.

With the heating element hidden behind a sleek black fascia, it negates all light that could be emitted from the unit.

Whether it is a garden patio, terrace, conservatory or even an outdoor seating area, the Igneous is designed to warm its surroundings and not the air - making it extremely economical.

#### FEATURES:

- Thin and Stylish
- Programmable Thermostat
- Efficient Directional Spot Heating
- Power Output Between 1000 – 3200W
- IPX4 Weatherproof Rating (Covered Areas)
- Adjustable Bracket With 90 Degrees of Movement
- Multiple Mounting Options – Either Wall Or Ceiling
